REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The examiner respectfully asserts that none of the prior art, taken either singly or in combination, is seen to teach or suggest the use of a motor-adjustable head rest comprising the particular structure of a head plate arranged at one end of a *curved* support shaft, the shaft between disposed between *three* rollers spaced from one another in a direction of adjustment which is perpendicular with respect to the axis of curvature of the support shaft, further wherein the rollers ride in *tracks* formed on the curved support shaft *which are shaped such that the instantaneous curvature centers of the tracks coincide with the instantaneous center of rotation Z_{mom} of a patient's head while resting on the head plate*, as explicitly recited in Applicant's sole independent claim 1. With regards to the cited prior art, Estrada et al. '242 and Fujiyama et al. '406 are considered to disclose the use of a head rest comprising a head plate supported by a curved support member disposed between a plurality of rollers; however, both of these references are silent with regards to the respective configurations of the instantaneous curvature centers of the tracks formed on the support shaft relative to the instantaneous center of rotation as specified by Applicant. Hence, it is considered that the application is currently in proper condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
